MAKE DIFFICULT DECISIONS EASILY

#1

COST - BENEFIT - TIME

When there are multiple choices in front of you, Quantify them in the following categories:

- Costs, expenses involved
- Benefits, income involved
- Time involved for results to show

Make a choice that is balanced and most appropriate

#2

PROS AND CONS

If you are stuck between 2 Options / 2 Solutions, make a detailed list of all its Pros (Positive points) and Cons (Negative points)

This will help you to make a Logical Decision, and it works for Professional as well as Personal Situations very effectively...

#3

MIND-MAPPING

- Write the situation in the centre of the space
- Brainstorm all the possible solutions to the problem
- Consider all the factors and stakeholders for every solution
- Zero down on the best alternative and create a rough Road-map of Execution
